RE: COVID-19 UPDATE—Continued Masking Encouraged

To my valued patients:

As of March 2021, I am fully vaccinated and have continued to wear a mask when working with patients and when out in public.

Given that there are COVID-19 variants present in our community and that 40-45% of the Pima County population have been vaccinated, I will continue to take extra precautions and safety measures as outlined below. Continued masking is strongly encouraged, especially for those who are not vaccinated.

Owner Responsibilities:

1. Reduced Daily scheduling (3-4 patients a day)
2. Extra time between patient appointments to reduce congestion in waiting room and to allow for room cleaning (15-60 minutes)
3. Review of COVID-19 questionnaire and waiver form prior to the treatment session to screen for risk and make the most informed decision regarding treatment appropriateness.
4. Continued use of pulse oximeter for oxygen saturation testing of patients if warranted.
4. Increased cleaning/sanitizing of surfaces/objects between patients and on a daily basis
5. Increased handwashing/use of sanitizing gel
6. Increased access to hand sanitizing gel
7. Continued use of HEPA air filter
8. Continued use of facial covering/masks during all patient visits

Patient Responsibilities:

1. Acceptance of oxygen saturation testing if warranted (done with a small device that clips onto your finger)
2. Use of facial covering/masks during visits is strongly encouraged for those who have not been vaccinated.
3. Completion of COVID-19 questionnaire and waiver prior to session
4. Do not bring anyone with you to the treatment session, unless absolutely necessary

Thank you for your continued support. Be well.
